Projects

DOYO V2, Oct 2020 – Cont.
A digital ordering app for customers to order food by a QR scan. My responsibility is to build the REST API's in django, review code of other developer and deployment on AWS by using docker.
Technologies: Python, Django, Reactjs. Docker, AWS
https://backend.doyo.ch/admin/

DOYO V1, May 2020 – Sep 2020.
A project in which I have to add localization using Google translate API and store the translations in MySQL database, further utilize it on the public side of website to accommodate the customers to select any given languages for their easier use. A complete design of making an order which has eight screens is implemented for mobile viewers and made the required API's in flask. Some changes are also made on admin side of frontend of the website. I worked on this project as a full stack developer.
Technologies: Python, Flask, Jquery, MySQL
http://doyo.it/

DAWN, Feb 2020 – June 2020
A hybrid app which is built using Reactjs on top of the Cordova (a framework to build hybrid apps using JavaScript, HTML and CSS). This app is for the hotel reservation and have feature of pre-bargaining for clients with the hotel management. A user has his profile and can post pictures and experience of a hotel. My responsibility was to handle the frontend changes that required Javascript and Reactjs skills.
Technologies: Reactjs, Corodva
